

Dear Educators & Parents:

Enclosed, you will find a sheet which contains four variations of this year's EarthFest Passport. We hope that the Passport activity will be a fun way for students to locate exhibitors and learn about various sustainability topics throughout the day.

In order to save trees, we ask that you use the enclosed sheet (which can also be found online at www.ambler.temple.edu/earthfest) to print only what you need for your students. There are four variations per sheet, remember, and each student only needs one variation. (A group of 4 students needs just one sheet, a group of 32 students needs just 8 sheets.) Please print/copy the sheets and cut them into individual Passports before arriving to EarthFest. You may also distribute them while in class or on the bus, to make things easier when you arrive to campus. It is also recommended that students write their names and schools on the Passports before arriving to the event.

To participate in the Passport activity, students simply locate the exhibitors listed on their Passports, visit those exhibits, and get their Passports stamped by the exhibitors. When all the squares are stamped on the Passport, the student should return it to any Information Table (see event map, also available online). Please make sure the students' names and schools are written on the Passports. Pencils will be available at the Information Tables.

After EarthFest, several completed Passports will be randomly selected to receive a special prize from the Pennsylvania Horticultural Society. That prize will be sent to the student's school.

Have fun!

Rachel Berger
