RESEARCH

My research examines the neuropsychological operations recruited for routine everyday activities, such as coffee-making or meal preparation. Unlike memory and language, the neurocognitive architecture of everyday action remains poorly understood. Thus, my research program aims to develop and refine a model of normal everyday action, to explain the breakdown of everyday action in people with cognitive deficits due to brain damage or disease, and to inform interventions that facilitate everyday action performance in patient populations.

Positions Held

- 2003 - 2004 Adjunct Scientist, Neuropsychology Laboratory, Moss Rehabilitation Research Institute, Philadelphia, PA
- 1997-1998 Research Assistant, Department of Cognitive Neuroscience, Allegheny University of the Health Sciences at the Medical College of Pennsylvania/ Eastern Pennsylvania Psychiatric Institute, Philadelphia, PA
- 1990-1996 Research Assistant, Moss Rehabilitation Research Institute, Neuropsychology Laboratory, Philadelphia, PA

Grants/Awards

- 2008 APA Division 40: Mentor to PI Brianne Magouirk Bettcher (graduate student) Early Career Award – “Empirically-based Interventions for Error Monitoring Deficits in Dementia” (\$10, 000)
- 2007 Michael J. Fox Foundation: Principal Investigator Rapid Response Innovation Award- “ Everyday Action Impairment in Parkinson’s Disease Dementia/Dementia with Lewy Bodies” (\$75,000)
- 2006 Alzheimer’s Association: Co-Investigator Investigator Initiated Research Award - “The Effect of Leukoaraiosis in Alzheimer’s Disease” (\$194,676)
- 2006 Temple University Research and Study Leave (Spring 2006 – 2007) “Everyday Action in Schizophrenia”
- 2005 Women in Cognitive Science: Travel Award \$2,000.00 in funding awarded for travel to the University of Florida
- 2005 Eisai Incorporated: Co-Investigator Aricept Grant- “Treating Patients with Alzheimer’s Disease with Significant Leukoaraiosis with Donepezil” (\$182,625)
- 2004 Alzheimer’s Association: Principal Investigator New Investigator Research Award- “ Facilitating Everyday Action Through Strategic Object Placement” (\$99,737)
- 2003 University of Medicine and Dentistry in New Jersey: Co-Principal Investigator Pilot Grant- “Personal Familiarity and Object Use in Dementia” (\$34,540).
- 2001 Albert Einstein Society: Co-Principal Investigator Pilot Grant- “Object Selection Errors in Naturalistic Action” (\$35,000).

Consulting

- 2008 National Institute of Health: Paid Consultant (\$121,196)
R01 - “Stroke and Cognition in Surgical Aortic Stenosis.”
PI- Thomas Floyd, M.D.
- 2007 National Institute of Health: Unpaid Consultant
R01- “BAS and Bipolar Disorder: Prospective Biobehavioral High Risk Design.”
PI – Lauren Alloy, Ph.D.

CLINICAL EXPERIENCE

My clinical interests include neuropsychological assessment, treatment planning, and cognitive rehabilitation with individuals suffering from a range of disorders, including degenerative dementia, epilepsy, traumatic brain injury, schizophrenia, and others. My experience includes working with interdisciplinary clinical teams in designing diagnostic and rehabilitation protocols in various inpatient and outpatient settings.
