

Report Title: Praxis Exam Scores Process

Report Number: **P87WU665**

Description: This process runs weekly on Tuesday night beginning at 7pm. It reads an uploaded input file of Praxis exam scores from the Educational Testing Service (ETS) and creates records that are posted to Education students' Test Score (G5) screens.

Exam records are selected from the input file if they have recipient college number 2906 (Temple University). Records with a different recipient college number and any that are missing exam date, test code or test score information are listed on the "College of Education Discrepancy Report". These records are not processed.

Exam records with invalid student ID's, invalid test codes or out-of-range test scores are listed on the "Rejected Praxis ISIS Update Records/G5" report and are not processed. Valid Praxis test codes and their valid score ranges appear on the TEST system table in ISIS. Contact your User Liaison in Administrative Computer Services if the TEST system table requires updates/corrections of Praxis exam information.

For the remaining exam records, G5 transactions are created based on the exam date, test code and test score information provided. All of the G5 transactions created are listed on a report titled "Test Scores to be Posted to ISIS".

A control report summarizes the number of G5 transactions attempted, the number of transactions that were valid and the number that were invalid. Any G5 transactions that are not successfully posted to ISIS due to invalid G5 information are listed in detail in the sequential driver error report.

Use: This process posts Praxis exam scores to ISIS for Temple's Education students for use by the College of Education administration.

Special Forms: None
