Development Opportunity

The **Technology Early Career Development Program (TECDP)** is a **three-year rotational program** providing associates the opportunity to receive broad technology and business exposure. The program is designed to groom well rounded IT professionals capable of growing into future CIGNA managers or technology experts. Strong emphasis is placed on associate development through a comprehensive rotational framework that incorporates prescribed technical and business training, mentoring and professional development in designated competency areas.

Career Path

As a member of CIGNA's IT team, you will receive broad technology and business exposure in an enterprise setting. Your experiences may lead you to a management role in IT or a position as a subject matter expert. There are several diverse opportunities across the organization available to you. Choose to explore those independently or leverage additional IT development and leadership programs to continue to grow your skills.
