

Wednesday, Feb 13, 2008

12:40 PM – 1:30 PM

Room 126

Engineering & Architecture Building

**All are invited to attend
Pizza will be served**

Environmental Seminar Series

Forest Roads: Ecology & Planning

Daniel Moscovici, Adjunct Professor, Arcadia University

Roads have been built through the forests for centuries. The Silk Road, the Appian Way and ancient Inca paths facilitated commerce and the spread of culture across the continents. However, today roads criss-cross most of the United States and contribute to significant ecological impacts. Proper planning and best management practices are the first step towards reducing the footprint of roads in forested areas.

**The CEE Department offers a Minor in Environmental Engineering, and a
MS in Environmental Engineering. For more information contact:
ceed@temple.edu, (215) 204-7814**
