

PROCEDURE CODES WITH UPDATED SERVICE NAMES

The following procedure codes are not changing but will have new names and/or service definitions effective July 1, 2009. The new names will be available in HCSIS after November 20, but will not affect the FY 08-09 plans. Providers should update their service offerings in the SSD to include the new services. Although the procedure codes remain the same, these services will not automatically appear on FY Renewal Plans. SCs should carefully review the new service definitions and manually enter the appropriate service into the FY 09-10 plans. Because service definitions are changing, the service with the same procedure code may or may not be the appropriate service selection for FY 09-10.
