Welcome to the COLLEGE OF ENGINEERING!

The staff, administration and faculty are excited you have chosen the College of Engineering (CoE) to pursue your degree. We are eager to meet and assist you with your course selection, professional goals and transition to Temple University.

The advisor you are working with today can help you register for classes based on your placement test scores. Your fall schedule should include the following:

• Math 1041 (Calculus I), Math 1022 (Precalculus), Math 1021 (College Algebra), depending on your placement test scores.

• English 0701/0711 or 0802/0812, depending on your English placement test scores.

• One Engineering course: ENGR 1101-Intro to Engineering, lecture and recitation or ENGR 1102 – Intro to Engineering Problem Solving, lecture and lab.

• Mechanical, Electrical, and Civil Engineering students must take Chemistry 1035 and Chem Lab 1033 (if placed into Math 1041 or higher). Bioengineering, Engineering Technology, Environmental Engineering, and Construction Management Technology students may take Chemistry 1031 and Chem Lab 1033 (if placed into Math 1022 or higher).

• Students who place into Math 1021 or lower can take a GenEd course.

After orientation, you can discuss your intended major with an engineering advisor and verify your roster. If you are unable to register for one or more of the classes listed above we will work with you to complete your schedule for the upcoming semester. Please note that you will need to attend a CoE information session in order to complete the change of major process, contact an advisor in the College for a day and time.

Once again, welcome to the College of Engineering. We hope this has been an informative and productive New Student Orientation. We look forward to meeting and working with you throughout your Temple career.

Sincerely,

Ms. Margarita Marengo, Advisor
